IMMUNOLOGY AND CELL BIOLOGY

VOLUME 65

SUBJECT INDEX

Aminopterin-monoclonal antibody conjugates, anti-tumour activity of: *in vitro* and *in vivo* comparison with methotrexate-monoclonal antibody conjugates (Kanellos, Pietersz, Cunningham and McKenzie), 483.

Animal models of human parasitic diseases and the testing of vaccines (Mitchell), 45.

Antibody conjugates, monoclonal, the use of, for the diagnosis and treatment of cancer (Pietersz, Kanellos, Smyth, Zalcberg and McKenzie), 111.

Antibody, mouse monoclonal, raised against acute myeloid leukaemia cells, specificity of a, for mast cells in human mucosal and connective tissues (Mayrhofer, Gadd, Spargo and Ashman), 241.

Antibody production, Langerhans cell presentation of sheep red blood cells induces (Halliday and Muller), 71.

Antigen expression during early human granulocyte development studied with immuno-electron microscopy (Hogg, Hodgson, Henderson, Williams, Jureidini and Zola), 305.

Antigenic analysis of *Strongyloides ratti* infective larvae and adult worms (Northern and Grove), 231.

Antigens, particulate, may be reprocessed after initial phagocytosis for presentation to T cells *in vivo* (Wright, Wood, Coia and Cheers), 505.

Antigens recognised by CD-1 monoclonal antibodies, further studies on the heterogeneity of: distribution of epitopes and analysis of serological binding patterns (Favaloro, Bradstock, Grimsley, Henniker and Kamath), 399. *Article reprinted with corrections*, 523.

Antigens, surface and excretory/secretory, of *Nematospiroides dubius* (Adams, Monroy, East and Dobson), 393.

Anti-infuenza A virus responses, human, high dose suppression of, using T cell clones (Adams, Wotherspoon, Hellqvist and Basten), 25.

Anti-tumour activity of aminopterin-monoclonal antibody conjugates; *in vitro* and *in vivo* comparison with methotrexate-monoclonal antibody conjugates (Kanellos, Pietersz, Cunningham and McKenzie), 483.

Azathioprine and prednisolone and ultraviolet irradiation, effects of therapy with, on mouse skin immune function and immune cell markers (Kelly, Scheibner and Sheil), 153.

Burnet Memorial Lecture, 1986. Burnetian legacy: scientists as citizens (Nossal), 1.

Burnetian legacy: scientists as citizens (Nossal), 1.

Cancer, the use of monoclonal antibody conjugates for the diagnosis and treatment of (Pietersz, Kanellos, Smyth, Zalcberg and McKenzie), 111.

Candidiasis, murine. Pathogenesis and host responses in genetically distinct inbred mice (Ashman and Papadimitriou), 163.

Capsaicin-treated and normal rats, substance P induces chemotaxis of neutrophils in (Helme, Eglezos and Hosking), 267.

Carbonic anhydrase — a marker for particles shed from the epithelium to the lymphoid follicles of the ileal Peyer's patch in goat kids and lambs (Landsverk, Jansson, Nicander and Ploen), 425.

CD-1 monoclonal antibodies, further studies on the heterogeneity of antigens recognised by: distribution of epitopes and analysis of serological binding patterns (Favaloro, Bradstock, Grimsley, Henniker and Kamath), 399. *Article reprinted with corrections*, 523.

Cell adhesion, evidence that the cytoskeleton plays a key role in (Chong, Parish and Coombe), 85.

Cell-mediated immunity, coagulation and the expression of (Ryan and Geczy), 127.

Cellular uptake and cytotoxicity of chlorambucil-monoclonal antibody conjugates (Smyth, Pietersz and McKenzie), 315.

Cervical carcinoma, invasive, of Western Australian women, DNA sequences of human papillomavirus types 11, 16 or 18 in (Kulski, Howard and Pixley), 77.

Chemotaxis of neutrophils, substance P induces, in normal and capsaicin-treated rats (Helme, Eglezos and Hosking), 267.

Chlorambucil-monoclonal antibody conjugates, the cellular uptake and cytotoxicity of (Smyth, Pietersz and McKenzie), 315.

Cholorquine, effect of, on cellular immune responses of normal and *P. knowlesi*-infected rhesus monkeys (Prasad, Mahajan and Ganguly), 211.

Coagulation and the expression of cell-mediated immunity (Ryan and Geczy), 127.

Colony-stimulating factors, the role of the, in resistance to acute infections (Metcalf), 35.

Colorectal cancer, automated leucocyte adherence inhibition testing in patients with (McLeod and Isbister), 377.

Complement, activated, the inflammatory activity of, in ovine and bovine mammary glands (Colditz and Maas), 433.

Complement activation by eggs and microfilariae of filarial parasites (Rao, Chandrashekar and Subrahmanyam), 365.

CR3 receptor on platelets and its role in the prostaglandin metabolic pathway (Cosgrove, d'Apice, Haddad, Pedersen and McKenzie), 453.

Cytomegalovirus, murine, the cytotoxic response to: requirements for the generation of MCMV-specific target cells (Sinickas, Ashman and Blanden), 173.

Cytoskeleton plays a key role in cell adhesion, evidence that the (Chong, Parish and Coombe), 85.

Cytotoxic response to murine cytomegalovirus: requirements for the generation of MCMV-specific target cells (Sinickas, Ashman and Blanden), 173.

Dextran sulphate, effect of on IgG subclass of antibody in efferent popliteal lymph of sheep (Kerlin and Watson), 411.
DNA polymorphism, hypervariable, characterisation and uses of a, associated with the human J_H immunoglobulin gene locus (Trent, Williams and Basten), 371.
DNA sequences of human papillomavirus types 11, 16 or 18 in invasive cervical carcinoma of Western Australian women (Kulski, Howard and Pixley), 77.
Elastic and non-elastic tissues, the immunohistochemical localisation of microfibril-associated glycoprotein (MAGP) in (Gibson and Cleary), 345. *Erratum*, 431.
Endotoxin, induction of inflammatory responses by, in the non-lactating ovine mammary gland (Colditz), 437.
Entamoeba histolytica, elicitation of protective immunity to — an experimental study (Nain and Vinayak), 217.
Enzyme immunoassay, an, to detect Australian flaviviruses and identify the encephalitic subgroup using monoclonal antibodies (Hall, Kay and Burgess), 103.
Epithelium, the follicle-associated, of the ileal Peyer's patch in ruminants is distinguished by its shedding of 50 nm particles (Landsverk), 251.
Eptatretus stoutii, the cyclostome, cellular requirements for mixed leucocyte reactivity in the (Raison, Gilbertson and Wotherspoon), 183.
Filarial parasites, complement activation by eggs and microfilariae of (Rao, Chandrashekar and Subrahmanyam), 365.
Flaviviruses, Australian, an enzyme immunoassay to detect, and identify the encephalitic subgroup using monoclonal antibodies (Hall, Kay and Burgess), 103.
Gene locus, human J_H immunoglobulin, characterisation and uses of a hypervariable DNA polymorphism associated with the (Trent, Williams and Basten), 371.
Genes in cloned murine cell lines that can be maintained in both interleukin 2- and interleukin 3-dependent growth states, expression of (Le Gross, Jenkins, Prestidge and Watson), 57.
Genetic control of lymphocyte positioning, analysis of the (Brenan and Parish), 495.
Glycoproteins in the human malaria parasite *Plasmodium falciparum* — lectin binding properties and the possible carbohydrate-protein linkage, studies on (Ramasamy), 147.
Glycoproteins, studies on, in the human malaria parasite *Plasmodium falciparum*. Identification of a myristilated 45k Da merozoite membrane glycoprotein (Ramasamy), 419.
Granulocyte development, early human, antigen expression during, studied with immuno-electron microscopy (Hogg, Hodgson, Henderson, Williams, Jureidini and Zola), 305.
Granulocyte-macrophage colony-stimulating factor, human, enhancement of neutrophil-mediated phagocytosis by, demonstrated using a novel mathematical model (Williamson and Brown), 329.
H-2K and H-2D antigen expression, *in vivo*, in two allogeneic mouse tumours of low immunogenicity (Ashley and Kotlarski), 323.
Heterologous protection in murine cutaneous leishmaniasis (Mitchell and Handman), 387.
Host defences by tumours, evasion of (Nelson and Nelson), 287.
IgA antibody response, specific, in Ross River virus infection (Carter, Fraser and Cloonan), 519.
IgG subclass of antibody, effect of dextran sulphate on, in efferent popliteal lymph of sheep (Kerlin and Watson), 411.
IL2, human T lymphocyte colonies require, and are inhibited by anti-tac (Woods and Lowenthal), 97.
Immune responses, cellular, of normal and *P. knowlesi*-infected rhesus monkeys, effect of cholorquine on (Prasad, Mahajan and Ganguly), 211.
Immune system, some problem areas in the interaction between viruses and the (Doherty), 279.
Immunity, protective, to *Entamoeba histolytica*, elicitation of — an experimental study (Nain and Vinayak), 217.
Immunogenicity of tumour cells (Ashman), 271.
Immunological competence of patients in remission from acute leukaemia: apparently normal T cell function but defective pokeweed mitogen-driven immunoglobulin synthesis (Ashman, Drew, Toogood and Juttner), 201.
Infections, acute, the role of the colony-stimulating factors in resistance to (Metcalf), 35.
Inflammatory activity of activated complement in ovine and bovine mammary glands (Colditz and Maas), 433.
Inflammatory responses, induction of, by endotoxin in the non-lactating ovine mammary gland (Colditz), 437.
Interleukin 2- and interleukin 3-dependent growth states, expression of genes in cloned murine cell lines that can be maintained in both (Le Gross, Jenkins, Prestidge and Watson), 57.
Langerhans cell presentation of sheep red blood cells induces antibody production (Halliday and Muller), 71.
Langerhans cells and skin allograft survival, effects of low or high doses of short wavelength ultraviolet light (UVB) on (Odling, Halliday and Muller), 337.
Leishmaniasis, murine cutaneous, heterologous protection in (Mitchell and Handman), 387.
Leucocyte adherence inhibition testing, automated, in patients with colorectal cancer (McLeod and Isbister), 377.
Leucocyte reactivity, mixed, in the cyclostome, *Eptatretus stoutii*, cellular requirements for (Raison, Gilbertson and Wotherspoon), 183.
Leukaemia, acute, immunological competence of patients in remission from: apparently normal T cell function but defective pokeweed mitogen-driven immunoglobulin synthesis (Ashman, Drew, Toogood and Juttner), 201.
Lymphocyte migration between mutually tolerant parabiotic rats (McCullagh), 263.
Lymphocyte positioning, analysis of the genetic control of (Brenan and Parish), 495.
Mammary gland, non-lactating ovine, induction of inflammatory responses by endotoxin in the (Colditz), 437.
Mammary glands, ovine and bovine, the inflammatory activity of activated complement in (Colditz and Maas), 433.
Mast cells in human mucosal and connective tissues, specificity of a mouse monoclonal antibody raised against acute myeloid leukaemia cells for (Mayrhofer, Gadd, Spargo and Ashman), 241.
Methotrexate-monoclonal antibody conjugates, the mode of action of (Smyth, Pietersz and McKenzie), 189.

Microfibril-associated glycoprotein (MAGP), the immunohistochemical localisation of, in elastic and non-elastic tissues (Gibson and Cleary), 345. *Erratum*, 431.
Milieu intérieur, the inconstancy of (Morris), 49.
Myeloid growth factors, human (Vadas, Lopez, Shannon and Atkinson), 141.
Nematospiroides dubius, mice vaccinated against, with antigens isolated by affinity chromatography from adult worms (Monroy and Dobson), 223.
Nematospiroides dubius, surface and excretory/secretory antigens of (Adams, Monroy, East and Dobson), 393.
Nippostrongylus brasiliensis infection and following systemic anaphylaxis, the effect of protein deficiency on systemic release of rat mucosal mast cell protease II during (Cummins, Kenny, Duncombe, Bolin and Davis), 357.
P. knowlesi-infected, and normal, rhesus monkeys, effect of cholorquine on cellular immune responses of (Prasad, Mahajan and Ganguly), 211.
Papillomavirus types 11, 16 or 18, human, DNA sequences of, in invasive cervical carcinoma of Western Australian women (Kulski, Howard and Pixley), 77.
Parabiotic rats, lymphocyte migration between mutually tolerant (McCullagh), 263.
Parasitic diseases, human, animal models of, and the testing of vaccines (Mitchell), 45.
Peyer's patch, ileal, in goat kids and lambs, carbonic anhydrase — a marker for particles shed from the epithelium to the lymphoid follicles of the (Landsverk, Jansson, Nicander and Ploen), 425.
Peyer's patch, ileal, in ruminants, the follicle-associated epithelium of the, is distinguished by its shedding of 50 nm particles (Landsverk), 251.
Phagocytosis, neutrophil-mediated, enhancement of, by human granulocyte-macrophage colony-stimulating factor demonstrated using a novel mathematical model (Williamson and Brown), 329.
Plasmodium falciparum, glycoproteins in the human malaria parasite — lectin binding properties and the possible carbohydrate-protein linkage, studies on (Ramasamy), 147.
Plasmodium falciparum the human malaria parasite, studies on glycoproteins in. Identification of a myristilated 45k Da merozoite membrane glycoprotein (Ramasamy), 419.
Prostaglandin metabolic pathway, CR3 receptor on platelets and its role in the (Cosgrove, d'Apice, Haddad, Pedersen and McKenzie), 453.
Protease II, rat mucosal mast cell, the effect of protein deficiency on systemic release of, during *Nippostrongylus brasiliensis* infection and following systemic anaphylaxis (Cummins, Kenny, Duncombe, Bolin and Davis), 357.
Protein deficiency, the effect of, on systemic release of rat mucosal mast cell protease II during *Nippostrongylus brasiliensis* infection and following systemic anaphylaxis (Cummins, Kenny, Duncombe, Bolin and Davis), 357.
Ross River virus infection, specific IgA antibody response in (Carter, Fraser and Cloonan), 519.
Ruminants, the follicle-associated epithelium of the ileal Peyer's patch in, is distinguished by its shedding of 50 nm particles (Landsverk), 251.
Schistosoma japonicum worms, responses in mice to Sj26, a glutathione S-transferase of (Davern, Tiu, Morahan, Wright, Garcia and Mitchell), 473.
Sj26, a glutathione S-transferase of *Schistosoma japonicum* worms, responses in mice to (Davern, Tiu, Morahan, Wright, Garcia and Mitchell), 473.
Skin allograft survival and Langerhans cells, effects of low or high doses of short wavelength ultraviolet light (UVB) on (Odling, Halliday and Muller), 337.
Skin immune function and immune cell markers, mouse, effects of therapy with azathioprine and prednisolone and ultraviolet irradiation on (Kelly, Scheibner and Sheil), 153.
Strongyloides ratti infective larvae and adult worms, antigenic analysis of (Northern and Grove), 231.
Substance P induces chemotaxis of neutrophils in normal and capsaicin-treated rats (Helme, Eglezos and Hosking), 267.
T cell clones, high dose suppression of human anti-influenza A virus responses using (Adams, Wotherspoon, Hellqvist and Basten), 25.
T cells, particulate antigens may be reprocessed after initial phagocytosis for presentation to, *in vivo* (Wright, Wood, Coia and Cheers), 505.
T lymphocyte colonies, human, require IL2 and are inhibited by anti-tac (Woods and Lowenthal), 97.
Transferrin receptor, human, heterogeneity of the, and use of anti-transferrin receptor antibodies to detect tumours *in vivo* (Panaccio, Zalcberg, Thompson, Leyden, Sullivan, Lichtenstein and McKenzie), 461.
Tumour cells, immunogenicity of (Ashman), 271.
Tumours, evasion of host defences by (Nelson and Nelson), 287.
Tumours, heterogeneity of the human transferrin receptor, and use of anti-transferrin receptor antibodies to detect, *in vivo* (Panaccio, Zalcberg, Thompson, Leyden, Sullivan, Lichtenstein and McKenzie), 461.
Tumours, two allogeneic mouse, of low immunogenicity, *in vivo* H-2K and H-2D antigen expression in (Ashley and Kotlarski), 323.
Ultraviolet irradiation and azathioprine and prednisolone, effects of therapy with, on mouse skin immune function and immune cell markers (Kelly, Scheibner and Sheil), 153.
Ultraviolet light (UVB), short wavelength, effects of low or high doses of, on Langerhans cells and skin allograft survival (Odling, Halliday and Muller), 337.
Vaccines, animal models of human parasitic diseases, and the testing of (Mitchell), 45.
Vaccines for the future — an update (Ada and Jones), 11.
Viruses and the immune system, some problem areas in the interaction between (Doherty), 279.
